

** ALASKA. 6110, Nov 20 at 1420, rock music at S9/+10, 1422 devotional talk about children; 1428 KNLS ID with Anchor Point postal address lacking the P O Box number where they must be well-known; or email KNLS@aol.com, outdated? I assume all the p- and e-mail really goes back to produxion HQ in Franklin TN. Back to ``today's best music``. Rather odd that this be right next to 6115 RNZI, but at least they are not colliding directly. RNZI no stronger and no problem until it musicalize, then better LSB KNLS. 6110 is axually the latest known scheduled frequency for this emission of its (Glenn Hauser, OK, WOR)

** ALASKA [non]. 13670, Sun Nov 22 at 1840, clear speech by YL in Russian about Jesus, i.e. KNLS via its other station MWV MADAGASCAR; tnx to tip from Richard Langley. This hour is supposed to be 'African Pathways Radio' in English. RL has previously heard them running KNLS in English. Now it's not only the wrong ``station`` but wrong language. It's almost as if they are randomly grabbing program files to put on the transmitter. 1847 indoctrinated kids singing 'Jesus Loves Me'.

Transmission break before 1900, but 13670 back on by 1902, again in Russian! Instead of Arabic scheduled now. Also S7-S9 direct. 1927 KNLS ID. Axually this seems to be a transmitter mixup. The other one is scheduled in Russian at 18-19 on 9880, 19-20 on 9845. What's on them now?

Well, at 1940, 9845 via UTwente is playing ``Light My Fire``, in English, hardly a gospel song, extended version. 1946 segué to another hard rock song with screamer, maybe Janis Joplin? I'm no rockficionado. 1951 another familiar hard rock song to 1955*, never any announcements, so can't tell what language service this was supposed to be --- but hardly the fare to be expected out of World Christian Broadcasting, despite its relatively diverse format on KNLS & MWV. Could it be that they have rented out one transmitter to something else, and consolidated their own programming on the other one, resulting in these language mixups at Mahajanga?

13710, after 9845 goes off, I retune UTwente to the next scheduled frequency for Arabic at 2000, and its carrier pops on at *1955.8, S9+20; 2000 ME music starts, and Radio Feda ID mentioning Mauritania, and so really in MWV Arabic.

11965, checked at 2001, Arabic song, and announcements by same M&W but no mention of Feda and definitely not // 13710 --- two separate Arabic programs at once. Instead of scheduled English. Later does mention Feda in passing. 2015 with times in Greenwich and Qahira. WHAT is going on here?? All of these with VG signals into UTwente.

BTW, I misspoke on WOR 2061, about previous MWV anomalies, sometimes interchanging Chinese hour with Arabic, not ``African`` (Glenn Hauser, OK, WOR)

** ARMENIA. 9290, Nov 24 at 1355 past 1400 with no break, S Asian language at S6-S9. Still there but weaker at 1417 vs running-H2O QRM. It's TWR-India via Gavar, in Hindi daily 1345-1415, amid a total span of 1315-1445 in various languages. Aoki/NDXC shows Hindi until 1420 on weekdays, otherwise English until 1425*, extended to 1445* weekends (Glenn Hauser, OK, WOR)

** BOLIVIA. 5952.50, Nov 21 at 2320, JBA carrier vs pointless Cuban pulse jamming, no doubt Radio Pío XII, Siglo XX on its signature split frequency, also vs 5950 WRMI; Ralphus Perry thinx it's active only on Saturday nights. Still JBA carrier via indoor longwire due to thunder at 0108 UT Sunday Nov 22 (Glenn Hauser, OK, WOR)

** BRAZIL. UNIDENTIFIED. 4925, Nov 25 at 0217, JBA talk, equivalent VP signal to S Americans on 4940, 4885. Only 4925 in EiBi is Korean numbers not at this hour but if on would not be propagating. WRTH 2020 has 5 kW Rádio Rural, Tefé, Amazonas, Brasil as irregular. Aoki/NDXC shows 0930-0200 as if regular. Not reported lately, but found this from JRJ in Brasil: ``4925. Apr 15, 2020. 0313-0333, Rádio Educação Rural de Tefé, Tefé-AM, in Portuguese. A musical program with variety songs; Female voice; A song; Male voice, ID and announcements; 0331 A song; 0333 Ends and sign-off. Poor reception.`` I don't get around to checking TWR Bonaire SDR for this until 0333 --- nothing there (Glenn Hauser, OK, WOR)

** BRAZIL [and non]. 11875-11880-11885, Nov 25 at 1949, TWR Bonaire SDR is getting an S6 steady DRM noise signal here, ~9 dB SNR, but nothing decoding to the ear. Via Richard Langley, this has just been reported in the DRMNA iogroup as the new frequency for RNA DRM tests; and it's already shown on the SDR menu as available 24 hours. This should make for an interesting collision with RHC-AM at 2100-2300 in French, English for Africa. Further monitoring:

2055 & 2058.5, break of a few seconds in DRM noise and back on, more to come: 2100 no sign of RHC yet, nor by 2108, just DRM. I have other stuff to do and not rechecked until 2134 --- now RHC is on, in Brazuguese, no less, along with the RNA DRM, roughly equal levels here and Bonaire, then RHC mostly atop but with fades; 2139.5 & 2142, more momentary breaks in DRM, but RHC is also off at 2141-2144. Meanwhile someone else is trying to hear 11880-DRM via Bonaire from Patos e Minas, Brazil. And so it goes --- (Glenn Hauser, OK, WOR)

** CANADA. 284-MCW kHz, Nov 23 at 0719 UT, dash and QD, 500 watts from The Pas, Manitoba. Evidently the name is not Anglo-French;

The Canadian Encyclopedia says: ``The origin of the name is uncertain, but it may be the Cree word W'passkwayaw, meaning "wooded narrows" (in the river) ... The Pas Band (now the Opaskwayak Cree Nation) surrendered the townsite in 1906 and moved to reserve lands on the north bank of the Saskatchewan River. Jun 11, 2019``. Well, cutting it to three letters is a whew goodthing (Glenn Hauser, OK, WOR)

** CANADA. 284-MCW kHz, Nov 20 at 0713 UT, ND beacon dash and QD, which is 500 watts from The Pas, Manitoba.

266-MCW kHz, Nov 20 at 0717 UT, dash and XD, 32-watt NDB from Edmonton, Alberta. I was tuned to 265-USB.

250-MCW kHz, Nov 20 at 0718 UT, dash and FO, 1600-watt NDB at Flin Flon, Manitoba.

233-MCW kHz, Nov 20 at 0720 UT, dash and BR, 200-watt NDB at Brandon, Manitoba (Glenn Hauser, OK, WOR)

** CANADA. 300-MCW kHz, Nov 19 at 0717 UT, dash and YIV, 500 watt ND beacon at Island Lake, Manitoba, vacillating whether it be LW or MW. Location is NE MB near Ontario, same latitude as north end of huge Lake Winnipeg. See also OKLAHOMA [non] (Glenn Hauser, OK, WOR)

** CHINA. 11150, Nov 20 at 1356, JBA carrier presumed CNR1 jammer, but no others found in the 13s, 12s, 11s or 10s before 1400. When propagation was summerier, there would be loads of them before most closed at 1400* (Glenn Hauser, OK, WOR)

** CHINA [and non]. 7545, Nov 21 at 1353, two Chinese stations mixing at almost same level, i.e. CNR1 jamming and VOA Mandarin via PHILIPPINES at 1300-1500. The ChiCom obviously have no shame, no sense of fairness, as USA allows CRI in unimpeded via CUBA on SW and even on domestic AM/FM stations (Glenn Hauser, OK, WOR)

** CHINA. 7325, Nov 21 at 2326, SE Asian language song and dramatic narration with extremely exaggerated diction, S8-S9. Aoki/NDXC shows it's CRI in Cantonese via Kunming (Glenn Hauser, OK, WOR)

** CHINA. CNR1 jammer search WOOB November 24 at 1346: JBA Chinese or JBA carriers: 11500, 11460, 11440, 11150, 11100, 10870; none in the 14s, 13s, 12s; 9315, 9300, 9180 (Glenn Hauser, OK, WOR)

** CHINA. 6020, Nov 25 at 1900, S8 via UTwente SDR, CRI theme, ID in Chinese and then ``Ju Flet ---`` which nails it as Albanian. Then YL narration with sound-effects, not just music.

This caused confusion when first reported from Europe, but now we know

from Albanian expert Ullmar Qvick in Sweden, BC-DX:

``CHINA/ALBANIA, RADIO EJANI on 6020 kHz heard at 1900-1957 UT has caused confusion. This is the CRI service in Albanian using the superpower tx in Shijiazhuang and carrying the program of the China-owned FM station Radio Ejani (Radio Come! in Albanian) broadcasting from Tirana and Durres on 106.0 MHz since 2013.

Pop music programs with frequent IDs "Radio Ejani" and final CRI announcement in Albanian from Beijing during the 1-hour transmission. The tx then carries CRI in Polish at 2000 z (Ullmar Qvick, Norrköping-SWEDEN, Nov 22)``

Like several other languages, CRI is unable to produce own programs in Albanian, so this is the roundabout substitute. Kai Ludwig replies:

``In case I keep forgetting to check it: Should be // 7385 kHz. The inserted CRI ID suggests that this simply replaces their own Albanian-language radio productions.

Remember that in last year CRI made drastic cuts to its linear radio programming, reducing many language services to hardly more than music and already telling listeners in Brazil that the radio service in Portuguese has ceased.

Radio Ejani just *is* CRI:
<https://www.facebook.com/pg/RadioEjani/about/>

No contacts in Albania whatsoever, so apparently the two FM transmitters just take a feed from Beijing, and this program output is now also routed to the transmitters in China previously used for separate Albanian shortwave broadcasts, if they still did them for some time after 2013 at all. Kai`` (Glenn Hauser, OK, WOR)

** COLOMBIA? 4940, Nov 23 at 0311, quick check of Bonaire SDR finds usual good signal of gospel huxter in Spanish from anonymous mystery missionary station -- AMMS? (Glenn Hauser, OK, WOR)

** CUBA. Supposedly going into effect Nov 17, new B-20 frequencies of RHC have not shown up by UT Nov 20; something's always wrong at RHC, e.g.: Nov 19 around 0300 still on 6145 not 9700; at 0710 only English frequency remaining is 6100. By Nov 20 at 0323, still on 6145 and 6000 only.

Nov 19 at 1450, still on 7350 not 9640. Nov 19 at 2200, still no revival of English to Africa on 11880; Spanish still on 11800 not 11850. Something's always wrong at RHC (Glenn Hauser, OK, WORLD OF RADIO 2061)

** CUBA. 13764 approx., Nov 19 at 1455, extremely distorted F# spurblob out of RHC 13700 AM is QRMing 13765 VOKorea, Commies vs Commies! minus 64 match 13636 is much weaker, and not audible circa 13828. Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 12200, Nov 20 at 1355, JBA carrier, suspiciously 2 x 6100 from Cuba, but no signal when I go there, nor later when I go back to 12200 --- must have just closed as nominally sked until 1400*. Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 11880, Nov 20 at 2239, RHC English is finally on revived time and frequency for Africa, so the B-20 sked is at last going into effect, 3 days later than publicized and 26 days after it began for every station else. Only S7-S9 and noisy. Something's always wrong at RHC.

How about Spanish? Yes, B-20 frequencies also activated including after 2240 chex Nov 20: 11850 S9+20 overmodistorted ex-11800, and also the minus 10 JBA parasite on 11840; plus 10 on 11860 there is also a carrier under the jamming needlessly continuing against no Martí. Same 11760 is also OMD. 9650 has good mod, S9+10 blocking attempt of Guinea to use just one frequency on the entire SW range, ex-9640 and still // weaker 9535. New 13680 also on and OMD, for Europe ex-15370 or is it also ex-13740? S9+10/20. After 0100 in English look for 9700 ex-6145; after 0500, 6060 should be back (Glenn Hauser, OK, WOR)

** CUBA. 4747 & 4782 approx., Nov 21 at 0236, ratchety spurblobs out of 4765 R. Progreso, plus/minus 17-18 kHz. Something's always wrong at RadioCuba (Glenn Hauser, OK, WOR)

** CUBA [and non]. 6000, UT Sat Nov 21 at 0125, RHC English on here only but no 6145, unsure of 9700 yet, if on not strong into a portable. Anyhow starting circa 0100, not 0200.

9700, by 0205 Nov 21 on the R75 I am hearing this new RHC English frequency with much-delayed B-20 sked going into effect, but it's only S3-S5, much less than 6000 which is S9 but undermodulated; and 9700 pales by comparison with the bigsig next to it from 9690 Spain.

9700, by 0333 Nov 21, this RHC has surged to S9+20, now stronger and with more modulation than 6000. At 0452 checking 9700 at Maine SDR, roughly equal collision, as predicted with Turkey in Turkish which was already there for B-20 at 04-07 UT; but at UTwente, only TRT. Something's always wrong at RHC.

6060, Nov 21 at 0459, Arabic music VG into Maine, i.e. ALGERIA via FRANCE with signature clickbeeping on defective Issoudun transmitter

but cuts off by 0500 leaving nuttin` but noise. Still no signal at 0548. RHC is supposedly reactivating 6060 in Spanish at 01-05, English 05-07, or -08? Maybe later, but if so this will be colliding at 04-05. Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 15700, Nov 21 at 1523, CRI English relay at S9+30 but undermodulated and hummy. Something's always wrong at RadioCuba but USA would never dream of jamming it, unlike vice versa (Glenn Hauser, OK, WOR)

** CUBA. 9700, Nov 21 at 0714, RHC English is still on here at S6-S9, better than // 6000; so supposed to run until 0800? But Ivo Ivanov says it cut off at 0735* and 6000 at 0710*[?]. Something's always wrong at RHC.

BTW, I missed it, but several others caught RHC on 6950 around 1400 Nov 21, which looks like a keypad punchup error by sloppyator for new 9650 at 1200-1600, which was not to be heard. SAWA (Glenn Hauser, OK, WOR)

** CUBA. 6950, Nov 21 at 2301, RHC Spanish is here again like it was for the morning broadcast, mispunched instead of missing 9650 probably from *2200v. S9+25/30 and distorted with some wild jazz --- or is that from the pirate jamming on the same frequency?? See NORTH AMERICA. By 2328 RHC is in the clear, and at 0103 Nov 22, when it's the OSOB, no pirates around, tuning with indoor longwire due to thunder (Glenn Hauser, OK, WOR)

** CUBA. 6145, Nov 22 at 0106 & 0324 chex, RHC English is back here after switch to 9700 for the first time last night. Changed their mind? Or weekend sloppyator didn't get the QSY message? There is a JBA carrier on 9700 at 0106 which would be RFA Kuwait in Uighur this hour only, and/or ChiCom jamming (Glenn Hauser, OK, WOR)

** CUBA. 6100, Nov 22 at 0720, only RHC English frequency still on, S9+20 but suptorted as Arnie is speaking, Breakthru? 6000, 6145 are off, 6060 has not activated yet, and 9700 last night is gone tonight. Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 9650, Sunday Nov 22 at 1442, RHC has managed to get back on new scheduled frequency, after misrunning 6950 both morning and evening yesterday, replacement for 7350. Amid `En Contacto` with Marta Rios, and then Prof. Arnaldo Coro Antich himself. Listened to a bit more of it on 13740 & 13700, without spurs today. Arnie is almost incomprehensible, babbling lickety-split --- you know, this almost sounds like he's artificially sped up.

Somewhere I have a cassette recorder with that feature, variable speed

playback, so you can compress speech and listen to something in less time than originally, yet without raising the pitch as would happen by simply playing a reel tape faster. Is he really doing that in order to cram more content into limited time available? Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 15700, Nov 22 at 1515, CRI Plus relay is S9+40, sup-torted and hummy. Something's always wrong at RadioCuba (Glenn Hauser, OK, WOR)

** CUBA [and non]. 9535, Nov 22 at 2327, RHC JBA under multiple collision, Commies vs Commies: Aoki/NDXC shows CNR1 jamming, RFA Tibetan via Kuwait; and also CRI English via Kunming. In fact seems to be an echo on the Chinese from more than one site. Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA [and non]. 6145, Nov 23 at 0312, no RHC English signal, at Bonaire remote, while 9700 is JBA, 6000 S8. To Missouri SDR, 9700 is VG S9+10, no 6145, and 6000 is S9+30 but JBM distorted --- must be 'DXers Unlimited' minus Arnie as his sub talks about propagation.

Another check at 0525: 9700 is on over CCI which would be Turkey; 6100 and 6060 are absent; 6000 suptorted; 6145 in Romanian which must be RRI, perhaps explaining why RHC evacuated tho I had not noticed this hour collision before. By 0608, 6100 is finally on, VG S9+30/40, so starting at 0600? Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 11880, Nov 23 at 2111, RHC in French also reactivated and // synchronized 15140 distorted; 13680 now in Portuguese poor at S8-S9. Something's always wrong at RHC (Glenn Hauser, OK, WOR) See BRAZIL

** CUBA. 11850, Nov 24 at 2205, RHC is dead air, then ramps up to JBM Spanish, perhaps a typical sign-on warmup, only S4-S7 as is English on 11880. Something's always wrong at RHC. But recheck at 2348, 11850 is off. Something's always wrong at RHC (Glenn Hauser, OK, WOR)

** CUBA. 9700, Nov 25 at 0222, RHC English is S5-S7, undermodulated, unusable. Only //, 6000 is even worse, S9/+10 and JBM. Somethings are always wrong at RHC (Glenn Hauser, OK, WOR)

** GREECE [and non]. 9420, November 22 at 0722, great Greek Orthodox chanting since it's Sunday morning, violating separation of church and state; meanwhile:

9645, Sun Nov 22 at 0723, Slavic chanting and singing at S5-S8, must be Vatican Radio, i.e. Ukrainian liturgy, from SMG, 0705-0800 Sundays only (Glenn Hauser, OK, WOR)

** JAPAN [non]. 9560, Nov 21 at 0334, news in English all about COVID-9 especially concerning Japan. Includes brief snippets of citizen comments voiced over into English, just like NHK does on TV. This is the *Swahili* service, but still inserting part of TV news audio in English instead of proper language. It's also a defacto North American service, always with a good signal from MADAGASCAR, 250 kW at 320 degrees toward E Africa but carrying on into deep North America. Shhh, don't tell anyone as we are not supposed to listen to Radio Japan in English on SW! 0339 plays some jingly-music, maybe to accompany video-only world weather info? But 0340 back into Swahili after seeming to intro show as ``Day Now``, of course IDing as required with English name ``NHK World`` in all languages; into songs (Glenn Hauser, OK, WOR)

** KUWAIT. 5959.888, Nov 20 at 0319 music at S6-S9, presumably R. Kuwait since *0300 always off-frequency, altho my first guess was XJPBS Urumqi, East Turkistan, land of ChiCom cultural genocide and brainwashing of Uyghurs, which is also 5960-minus, but 2+ hours past sunrise there at 0111 UT (Glenn Hauser, OK, WOR)

** KUWAIT. 15540, 15530, 11970, Nov 23 from 1800, no signals from anything on R. Kuwait frequencies. Pedro Sedano, Spain, had recorded the 0800 UT sign-off announcement on 15530 saying that was on 11970 and English would resume at 1800-2100 on 15540 for Europe and North America --- altho morning English recently resumed replacing Arabic, still no evening English, unless on and not propagating, but I doubt that, rather a very old recorded outdated announcement. But perhaps there be hope. That transmission presumably still exist at least on FM & AM (Glenn Hauser, OK, WOR)

** MADAGASCAR. 5009.919, Nov 21 at 0240, JBA talk maybe French from RNM always off-minus, S8-S9 vs noise level of S6-S7; WRMI closes at 0230 clearing for this which now copes only with that chirping from 5007. India is gone for good from 5010, but if WRMI-14 is weak enough, you might hear a het from Mad. before 0230 (Glenn Hauser, OK, WOR)

** MADAGASCAR. 11965, Nov 19 sometime after 20 UT, MWV in African Pathways Radio with African accent, including an unAfrican anti-Science so-called `Creation Moment`, so no KNLS Alaska program instead at this time, as had been reported twice before by Richard Langley, NB in the 18 UT hour on 13670, maybe a mixup. Both these put good signals into North America. I still haven't managed to check which English is appearing at 1800 (Glenn Hauser, OK, WORLD OF RADIO 2061) MADAGASCAR. See ALASKA [non]!

** MADAGASCAR. 11610, Nov 23 at 2145, MWV in correct language, Chinese, always VG >> 4.000 MHz higher, 15610 WEWN English; other MWV

frequency 9765 in correct Portuguese altho the final praise song sounds Spanish until 2157 dead air with no closure (Glenn Hauser, OK, WOR)

** MEXICO [and non]. 6185-, Nov 22 at 2319, XEPPM is S9, as always undermodulated, but now also with CCI, Chinese? No, per Aoki/NDXC, CRI in Mongolian this hour via Xianyang 59 site. Mexico's last SW station don't get no respect, as Ivo Ivanov also notes:

``Upcoming frequency change of NHK World Radio Japan via MBR Moosbrunn, Austria, ex-6155 from Nov 30:
0430-0500 NF 6185*MOS 300 kW / non-dir to WeEu English Mon-Fri
0500-0530 NF 6185*MOS 300 kW / non-dir to WeEu English Sat/Sun
0400-0430 on 6185*MOS 300 kW / 115 deg to N/ME Turkish Daily AWR
*bad news for 6185 MEX 001 kW / non-dir to CeAm Spanish Daily XEPPM Radio Educacion!``

Per Aoki/NDXC other 6185 obstacles: China Huayi from 0915, VOK from 1000, and Vatican in Chinese until 2230 (Glenn Hauser, OK, WOR)

** NIGERIA. 7255-, Nov 23 at 0605, no signal from VON (Glenn Hauser, OK, WOR)

** NIGERIA. 7255-, Nov 25 at 0636, VON is back on tonight, S9+10/20 but undermodulated (Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6925-USB, Nov 20 at 2108, S6 pirate playing ``La Bamba``. Initially unID logs here later say IDed as WDOG:
<https://www.hfunderground.com/board/index.php/topic,74523.0.html>
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6935-USB, Nov 20 at 2109, bit of music then SSTV beepery, S9+10/20, much stronger than neighbor on 6925-USB. 2110 brief distorted unreadable voice announcements and more SSTV. 2112 pause and more SSTV, noisy announcement, L&C clear ``Don't Tread on Me`` 2nd-amendment song now S9+25 peaks; 2116 another song. Strangely enough there are no logs of this bigsig in HFU, but there was similar behaviour an hour earlier as unID:
<https://www.hfunderground.com/board/index.php/topic,74517.0.html>
An SSTV proclaimed: ``I HAD MY / PATIENCE / TESTED / I'M NEGATIVE``
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6970-AM, Nov 20 at 2110, JBA carrier, unID pirate? 2118 fading up S3 to S5 so I can make out a bit of English talk. During previous hour this was reported on 6969.9 as unID relay of WPTI 94.5 Greensboro NC:
<https://www.hfunderground.com/board/index.php/topic,74516.0.html>
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6950-LSB, Nov 21 at 2301, R. Habana Cuba is again like this morning on 6950, a big mistake instead of 9650 by the incompetent lysdexic sloppyator --- but with heavy QRM from a pirate which appears to be deliberately jamming it on LSB only --- about time RHC got jammed! By 2303 the pirate music has switched to SSTV beepery, 2304 a few clock chimes and back to music, hard-rock guitar and vocal, mostly overriding RHC also when tuned in AM mode, thanks to RHC carrier.

Eric Fetters-Walp replies at 0017 on the WOR iogroup: ``Yes, indeed, that was the pirate known as Damn Skippy, famous for sending many SSTV images during his broadcasts. Both he and RHC were audible even in AM mode from here near Seattle.`` Many more reports here with SSTV images:

<https://www.hfunderground.com/board/index.php/topic,74626.0.html>
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6927-USB, Nov 21 at 2307, rock music peaks S8-S9; 2308 talk mentions ``for de moon[?], wishing a good weekend for all, 91.5? FM, quite low power tonight, outboard engine not on`` and something about the White House, 2310 off. Many reports here of ``Take Back the White House Radio``, altho one also mentions Zekey:
<https://www.hfunderground.com/board/index.php/topic,74625.0.html>
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6880-USB, Nov 21 at 2311, soft almost `space` music, at S9+5/25, still at 2328. Many reports here as Mix Radio International, as early as 1927, as late as 0253!:
<https://www.hfunderground.com/board/index.php/topic,74604.0.html>
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6950.9-AM, Nov 22 at 2312, JBA music at S6 = QRN level. Insane Radio as reported here much better:
<https://www.hfunderground.com/board/index.php/topic,74716.0.html>
(Glenn Hauser, OK, WOR)

** NORTH AMERICA. 6924.884-AM, Nov 25 at 0223, VP S7-S8 music, only pirate activity now; 0232 brief announcement, more music, LA? 0253 still going, at 0254 into MCW, but fading and only partially copiable and perhaps with errors; ``CA - OA - OIAEN - ZAN - ORA - ABEC``, until 0258*. Thought it might be Nova, which does CW IDs, but no fit.

KIPM was reported on ``6925`` as late as 0130, but in USB:
<https://www.hfunderground.com/board/index.php/topic,74782.0.html>

Stardust Five Laser Radio was on 6925-AM, but not since 2158 Nov 24:
<https://www.hfunderground.com/board/index.php/topic,74777.0.html>

I was hoping someone on HFU would have IDed this and/or copied the code. Nor any old hits there on the exacter frequency 6924.9 -- but I had such a log last Feb, which led back to Captain Morgan SW in May 2017 (Glenn Hauser, OK, WOR)

Ron Howard replied: ``Glenn, Was also listening to this station. Please listen to my recording and let me know what you can make out. Thanks.

Nov 25, on 6924.88 AM, tuned in at 0149 UT to non-stop LA music; 0206, CW (assume ID?) followed by spoken ID (loop); 0209, test tone, followed by more of the same type of music. Afraid I have no ability to deal with CW and very little to deal with Spanish. My audio of one minute of music, then CW ID, followed by spoken IDs (loop), posted at <https://bit.ly/3l1Dg03>
Thanks very much for any help! Ron California``

I replied: ``Ron, Great, clear recording. CW is ZANAHORIA EN ESCABECHE
Then M&W repeat multiple times ``ésta es la zanahoria en escabeche``

Put that phrase in search and it means ``spicy pickled carrots`` --- a Mexican dish; ah yes, I've had those without knowing their name -- but -- now what? Well, Mexico is really in North America... Glenn``

Ron Howard refers to a belated log of this from Chris Smolinski at <https://www.hfunderground.com/board/index.php/topic,74793.0.html>

``I received this station last night, after a somewhat laborious session of listening to the SDR recordings I came up with this logging:

ZANAHORIA EN ESCABECHE 6924.9 AM 0111 UTC 25 Nov 2020
« on: Today at 15:01 » SDR recording catch

0111 Carrier came on
0117 Music, Jorge Negrete "Ay Jalisco No Te Rajes", SIO 333
0121 Jorge Negrete "Yo Soy Mexicano"
0126 Jorge Negrete "Cocula"
0128 Jorge Negrete "Juan Charrasqueado"
0131 ZANAHORIA EN ESCABECHE repeated several times in CW
0134 SS OM "Esta es la ... " repeated, signal has faded by now, down to SIO 222 and then most 111 with some occasional peaks.
0136 CW again: ZANAHORIA EN ESCABECHE
0138 Music, too weak for Shazam.
0155 Mariachi Pablo Olmedo "Ay Jalisco No Te Rajes"
0206 CW again, weak.

0210 Back to music
0215 "Asunto Pendiente"
0254 CW, weak, sounds like ZANAHORIA EN ESCABECHE
0258 Carrier off

I would greatly appreciate an eQSL if the station operator happens to see this logging, thank you! « Last Edit: Today at 15:05 by ChrisSmolinski » Logged Chris Smolinski Westminster, MD``

As for the carrot pirate, no telling which side of border it's on but would be neat if it's really in Mexico (Glenn Hauser, OK, WOR)

** OKLAHOMA [non]. 350-MCW kHz, Nov 19 at 0730 UT, no signal from RG, ND beacon at Will Rogers World Airport, OKC; all I hear is from 351-MCW kHz, dash and YKQ, 500 watts from Fort Rupert - Waskaganish, Quebec.

515-MCW kHz, NDB PN in Ponca City, is still OFF as of Nov 19, gone for good? I last logged it July 30 after an absence, and first noted it missing again August 11, forever since; leaving nothing on the 500-529 band but some occasional NAVTEX hash around 518 (Glenn Hauser, OK, WOR)

** OKLAHOMA. 350-MCW kHz, Nov 20 at 0705 UT, ND beacon RG at WRWA OKC is audible again after missing last night. Altho the carrier can be fairly strong, the modulation level is fairly weak (Glenn Hauser, Enid, WOR)

** PANAMA. 18146.8-USB, Nov 24 at 2155, HP3SS working US stations, at 30 miles from Costa Rican border in western Panamá. Sounds like an American --- no, Canadian, without a specific address in QRZ.com: ``HP3SS Panama flag Panama, Robby Robertson, Volcan, Panama. QSL: via AC20V`` and: ``Please do not send mail to Panama. I will not receive it. Please do not QSL via buro. I do not receive cards from the QSL buro. I have been living in Panama since October 2015. I operated as HP3/VY2SS for a year while I waited for my Panama call. I enjoy contesting and DX. My equipment is: Flex 6400 and Ameritron AL-1200. Antennas are: 20M-6M - 3 element Steppir yagi at 75 feet. Please QSL direct to AC20V with SAE and sufficient return postage. Previous calls - VY2SS, CY9SS, VE2/VY2SS, VE7ARS, VE8HF, VE3FYB, VE1AGN``.

BTW, in my daytime bandscans between the ham and bc bands, I routinely tune across the 17.9+ MHz aero band --- and **never** encounter any activity. EiBi lists a number of stations around the world available 24 hours, starting with Albrook, Panamá on 17901. Maybe the aeronauts are writing off this band as dead even when it isn't (Glenn Hauser, OK, WOR)

** PRIDNESTROVYE. 11530, Nov 21 at 1527, Dengê Welat at S5-S8 in presumed Kurdish with long/short path echo. Annoying as it may be, a sign of improving propagation when a signal reach us both ways. Assuming this is not the Turkish jammer, distance from Grigoriopol', Moldova to Enid is 5805 statute miles short, so long path 24900 minus 5805 = 19185. Difference between 19185 and 5805 is 13380 miles. At lightspeed of 186 kmiles/second, the echo delay computes to 0.072 second, or about one fourteenth of a second. Sounds about right (Glenn Hauser, OK, WOR)

** SCOTLAND [non]. 5850, UT Sun Nov 22 at 0100-0200, I listen to the entire 'Encore' on WRMI, great classical music and great signal except for a bit of selective fading distortion to remind us that SW is a dynamic medium --- same edition as in 21/11 Playlist that I heard part of last night on a surprise prepeat at 0300 UT Sat on 5800 (Glenn Hauser, OK, WOR)

** U A E. 5995.096, Nov 20 at 0320, another JBA algo, presumed BBC Arabic as scheduled this hour from this site so replete with offfrequenciness (Glenn Hauser, OK, WOR)

** U A E. 11925.12 approx., Nov 20 at 1416, open carrier or JBM. Only listee in EiBi is this site with NHK relay in English at 1400-1430. Something's doubly wrong at Abu Dhabi Media, mostly off-frequency. WRTN 2020 says it's state-owned but operated and maintained by the UK's Encompass, which one would think could do a better job of it. And do their clients not know or care what's happening? BTW, this transmission is absent from Japan's own Aoki/NDXC list (Glenn Hauser, OK, WOR)

** U S A. 274-MCW kHz, Nov 23 at 0718 UT, ND beacon RG, which is 25 watts from Red WinG, Minnesota, a.k.a. Shoe City; and not to be confused with our RG on 350 in OKC. I was tuned to 272-USB (Glenn Hauser, OK, WOR)

** U S A. 329-MCW kHz, Nov 20 at 0710 UT, NDB PMV, 25 watts from Plattsmouth, Nebraska. Also four 2-letter Canadians, q.v., and Oklahoma, q.v. in same session (Glenn Hauser, OK, WOR)

** U S A. 383-MCW kHz, Nov 22 at 0729 UT, ND beacon CNP, 25 watts from Chappell, Nebraska. Axxually could not copy third letter due to fade, but has to be this.

400-MCW kHz, Nov 22 at 0728 UT, ND beacon AHQ, which is 25 watts from Wahoo, Nebraska (Glenn Hauser, OK, WOR)

** U S A. 404-MCW kHz, Nov 21 at 0725, ND beacon XCR, which is 25 watts from Little Falls - Camp Ripley, Minnesota, between St. Cloud

and Bemidji in central MN. I was tuned to 402-USB. New log here (Glenn Hauser, OK, WOR)

** U S A. 414-MCW kHz, Nov 24 at 0708 UT, ND beacon ATS, which is 25 watts from ArTeSia, New Mexico; also audible tuned to 412-USB. Last logged Oct 6 (Glenn Hauser, OK, WOR)

** U S A. 420-MCW kHz, Nov 25 at 0650, ND beacon FQ, which is 25 watts from Fairmont, Minnesota, also with a much weaker understation I can't fully copy with storm crashes, but rather sure there is an X in the call. The only one listed around here is on 419, TX, 50 watts in Lawrenceville - Gwinnett, Georgia (Glenn Hauser, OK, WOR)

** U S A. 18158-USB, Nov 21 at 1922, N4UT calling for check-ins before a 1930 net, but what? Calls from all over US, widely variable strengths. Retry 1947 finally names it, ``Ole Miss 17 meter net``. 26 stations are on the work-list, he will run thru so each may call another. More at omiss.net. N4UT admits he is in Virginia. Is this for alumni, or what? Apparently nothing to do with Oxford, rather stands for OM International Sideband Society. Does this mean YLs are excluded? Apparently for expediting award-chasing such as WAS (Glenn Hauser, OK, WOR)

** U S A. 21220-USB, Nov 21 at 1918, KA2ABA in western New York, Steve, calling CQ after a contact with California. DXMAP shows sporadic E MUF over central USA up to 25 MHz, but that may have been double hop. 1919 contacts WC6H in Valley Springs, also audible here circa midpoint. OSOB until algo on 21300-USB (Glenn Hauser, OK, WOR)

** U S A. 21250-USB, Nov 24 at 1859, WW2DX calling CQDX 15, good signal yet the OSOB; what a desirable vanity callsign: ``WW2DX USA flag USA, Lee J Imber, Pawling, NY 12564 USA``. Per QRZ.com he's quite the DX-peditioner, including Sable Island postponed from Oct 2020 to Oct 2021 (Glenn Hauser, OK, WOR)

** U S A [and non]. 17700, Nov 21 at 1924, huge S9+20/30 signal slightly overmod/distorted in French with heavy African accent, got to be VOA Grimesland NC - not noticed before but in B-20 HFCC for one hour daily at 1900-2000, 250 kW almost due east and plenty to the west. Also a lite long-path echo which is getting close to the max from a site short-path so close. Soon to interviewer speaking proper French.

Is it // 15730? Seems same but far out of synch and much weaker, chopping off at 1928*. 17700 still going past 1930 but with a program change. Then I find 15730 back on much stronger than before, S9+20 and now it is in synch with 17700; discussion about Burkina Faso. Yes, 15730 makes a site switch from BOTSWANA to GB at 1930, but it is

anything but smooth (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2060 monitoring: confirmed final repeat, UT Thu Nov 19 at 0100 on WRMI 7780, good S9+10/15 at Utwente

WORLD OF RADIO 2061 contents: Alaska and non, Armenia, Bougainville, Brasil, Cayman Islands, China, Cuba, East Turkistan, El Salvador, Equatorial Guinea, France, Germany, Guinea, India, Japan, Kashmir, Korea North & South and non, Kuwait, Madagascar, Mongolia*, Myanmar, Palau, Papua New Guinea, Sudan South non, Switzerland, Taiwan, Tajikistan, Tibet non, USA, Vanuatu, Vatican, Venezuela, Vietnam and non, Zambia, unID 4109.82; Radio Shack & Universal Radio; and the propagation outlook --- *I mentioned 12084.8 by mistake instead of 12014.8 but it is another Mongolia frequency --- yes I am *perfect*ly willing to correct my own mistaxe, let alone those of others

WOR 2061 is available as of 0124 UT Friday November 20
(mp3 stream) <http://www.w4uvh.net/wor2061.m3u>
(mp3 download) <http://www.w4uvh.net/wor2061.mp3>

Or via <http://www.worldofradio.com/audiomid.html>
Also link to podcast services.

The shortwave broadcasts should be:

0130 UT Friday	WRMI 5850 to NW & 5010 to S
0130 UT Friday	WRMI 9955 to SSE [jammed?] NEW
0130 UT Saturday	WRMI 7780 to NE
1300 UT Saturday	WRMI 15770 to NE
2030vUT Saturday	WAORCR 1860-AM
2300 UT Saturday	WRMI 7780 to NE
0400vUT Sunday	WAORCR 1860-AM [nominal 0415; as late as 0500]
0030 UT Monday	WRMI 7730 to WNW
0130 UT Monday	WRMI 7780 to NE
0230 UT Monday	WRMI 7780 to NE, 5800 to SSE
0400vUT Monday	WBCQ 6160v Area 61 to WSW
0430 UT Monday	WRMI 9955 [jammed?] to SSE

2300 UT Wednesday	WRMI 9955 to SSE
0100 UT Thursday	WRMI 7780 to NE

Full schedule including AM, FM, webcasts, satellite, podcasts:
<http://www.worldofradio.com/radioskd.html>

Our non-commercial broadcasts and website depend on voluntary support:
by MO or check in US funds on a US bank to:
Glenn Hauser, P O Box 1684, Enid OK 73702

Or via PayPal, not necessarily in US funds, to: woradio at yahoo.com

Confirmed first broadcasts UT Friday November 20 at 0130 on WRMI: On System F, 5850 VG, // 5010 fair S9/+10 but noisy and again chirping from 5007; and confirmed not synchronized separate playout on System B, NEW 9955 fair S8-S9 but fading down and out before 0200, not much jamming. At 0235 Bonaire is getting 9955 at only S4-S5 (Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2061 monitoring: confirmed UT Saturday November 21 at 0130 on WRMI 7780, VG S9+10/15 into UTwente SDR and also VG into Maine. Next:

1300 UT Saturday WRMI 15770 to NE
2030vUT Saturday WA0RCR 1860-AM
2300 UT Saturday WRMI 7780 to NE
0400vUT Sunday WA0RCR 1860-AM [nominal 0415; as late as 0500]

1900vUT Monday IRRS 7290 Bulgaria to WNW, 594-Italy
0100 UT Tuesday WRMI 7780 to NE

0200 UT Tuesday WRMI 9955 to SSE [jammed?] NEW
0330 UT Tuesday WRMI 5800 to SSE
2200 UT Wednesday WBCQ 7490v to WSW
2300 UT Wednesday WRMI 9955 to SSE
0100 UT Thursday WRMI 7780 to NE
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2061 monitoring: confirmed Saturday November 21 at 2032 on WA0RCR, 1860-AM, Wentzville MO, about 1 minute in so started almost on-time of 2030. This does not necessarily mean the repeat will be at 0415, as there are plenty of variable-length hamshours in between. Local quality reception via nearby remote at Warrenton MO, but a few storm crashes.

Also confirmed Sat Nov 21 at 2300 on WRMI 7780, VP S9-S5 direct.
Next:

0400vUT Sunday WA0RCR 1860-AM [nominal 0415; as late as 0500]
0030 UT Monday WRMI 7730 to WNW
0130 UT Monday WRMI 7780 to NE
0230 UT Monday WRMI 7780 to NE, 5800 to SSE
0400vUT Monday WBCQ 6160v Area 61 to WSW
0430 UT Monday WRMI 9955 [jammed?] to SSE
1900vUT Monday IRRS 7290 Bulgaria to WNW, 594-Italy
0100 UT Tuesday WRMI 7780 to NE
0200 UT Tuesday WRMI 9955 to SSE [jammed?] NEW
0330 UT Tuesday WRMI 5800 to SSE
2200 UT Wednesday WBCQ 7490v to WSW
2300 UT Wednesday WRMI 9955 to SSE
0100 UT Thursday WRMI 7780 to NE
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2061 monitoring: confirmed UT Sunday November 22 at 0416 UT on WA0RCR, 1860-AM, MO, about 3 minutes into so started slightly early circa 0413; VG by local-range pickup at Warrenton MO SDR, with some storm crashes. Next:

0030 UT Monday WRMI 7730 to WNW
0130 UT Monday WRMI 7780 to NE
0230 UT Monday WRMI 7780 to NE, 5800 to SSE
0400vUT Monday WBCQ 6160v Area 61 to WSW
0430 UT Monday WRMI 9955 [jammed?] to SSE
1900vUT Monday IRRS 7290 Bulgaria to WNW, 594-Italy
0100 UT Tuesday WRMI 7780 to NE
0200 UT Tuesday WRMI 9955 to SSE [jammed?] NEW
0330 UT Tuesday WRMI 5800 to SSE
2200 UT Wednesday WBCQ 7490v to WSW
2300 UT Wednesday WRMI 9955 to SSE

0100 UT Thursday WRMI 7780 to NE
(Glenn Hauser, OK, WOR)

** U S A [and non]. WORLD OF RADIO 2061 monitoring: missed checking UT
Mon Nov 23 at 0030 on WRMI 7730; did anyone hear it?

Confirmed UT Mon Nov 23 at 0130 on WRMI 7780, G S9+10 at UTwente.

Also confirmed UT Mon Nov 23 at 0230 on WRMI 7780, S8-S9 at UTwente;
also on 5800, S9+25 into Pardinho, Brasil SDR; also almost
synchronized on WRN webcast.

Also confirmed UT Mon Nov 23 at 0400 on Area 51 webcast, after a
Miller Beer commercial(?); but on WBCQ 6159.9 direct at 0427, JBA vs
HNL = high noise level.

Also confirmed UT Mon Nov 23 at 0430 on WRMI 9955, good S9+10/20/30
direct, as usual right after 2+ minutes of music fill from R. Prague
relay, no ID break. No pulse jamming? Only audible during some RMI
fades; still at good level toward end of semi-hour. You never know
whether this transmission will be VG or JBA.

Also confirmed Mon Nov 23 from 1901 on IRRS 7290 via Bulgaria,
recorded via UTwente and checked later: *1857.5 carrier on quieting
but still with annoying ACI splash continuing during WOR; almost 1900
IRRS sign-on with Milano PO Box and phone, 3 quick FSN headlines and
then WOR: spotchecked intact for next 13 minutes at least. Next:

0100 UT Tuesday WRMI 7780 to NE
0200 UT Tuesday WRMI 9955 to SSE [jammed?] NEW
0330 UT Tuesday WRMI 5800 to SSE
2200 UT Wednesday WBCQ 7490v to WSW
2300 UT Wednesday WRMI 9955 to SSE
0100 UT Thursday WRMI 7780 to NE
(Glenn Hauser, OK, WOR)

** U S A. WORLD OF RADIO 2061 monitoring: confirmed UT Tuesday
November 24 at 0100 on WRMI 7780, VG S9+15/20 via UTwente; at 0121
check direct, poor S8-S9.

Also confirmed UT Tue Nov 24 at new time 0200 on WRMI 9955, S9+10
direct.

Also confirmed UT Tue Nov 24 at 0330 on WRMI 5800, S9+10/20 direct.
Next:

2200 UT Wednesday WBCQ 7490v to WSW
2300 UT Wednesday WRMI 9955 to SSE

0100 UT Thursday WRMI 7780 to NE
(Glenn Hauser, OK, WOR)

** U S A. WORLD OF RADIO 2061 monitoring; next: {all confirmed}
2200 UT Wednesday WBCQ 7490v to WSW
2300 UT Wednesday WRMI 9955 to SSE
0100 UT Thursday WRMI 7780 to NE

Full schedule including AM, FM, webcasts, satellite, podcasts:
<http://www.worldofradio.com/radioskd.html>

Our non-commercial broadcasts and website depend on voluntary support:
by MO or check in US funds on a US bank to:
Glenn Hauser, P O Box 1684, Enid OK 73702

Or via PayPal, not necessarily in US funds, to: woradio at yahoo.com
(Glenn Hauser, OK, WOR)

** U S A. (7490.1v), UT Sat Nov 21 at 0100, WBCQ webcast as 'AAAWWW'
is starting with WTO theme. First subject about drug prices,
conspiracy theory that the China-produced virus is being used as an
excuse to keep drug prices high in the US, tnx to the Rothschilds,
Bilderburgs, Illuminati --- but AHW reminds us ``don't want to sound
like conspiracy theorists`` meanwhile going on about this thinly
veiled anti-Semitic stuff; ``the election ain't over`` so plenty more
politiix in store this week. AHW wants to play some podcast he heard
but has to do it by holding his phone up to mike. Tune out. Tune back
in at 0132 to 6159.9 confirmed // via Warrenton SDR as same other voice
is still going back on webcast, but studio quality so AHW must have
found a better way to connect. 0143 finally outroing this guest with
his name and name of program which I am not going to repeat, as he has
been making a totally bonkers conspiracy case about this cabal trying
to control us. By 0153 reading e-mails, all of whom seem to be
deep-enders in agreement. Wrapup as usual with prayer, and canned AHW
ID cuts off live AHW before he finishes in time for 0200 Hal Turner
(Glenn Hauser, OK, WOR)

** U S A. (7490.1v), UT Tue Nov 24 from 0000, WBCQ webcast cuts off
some wacko conspiracy talk for 50% of 'Uncle Bill's Melting Pot',
replay from 25 hours ago when it all aired; starting with a scrotum
song, but we have been warned. Also plugs his TG special UT Fri Nov 27
at 0300-0400 on 6160v & 7490v. I often catch this semi-repeat due to
a scheduling conflict the day before (Glenn Hauser, OK, WOR)

** U S A. 4980, still not hearing any JBA carrier or modulation from
WRMI-4. For a while this frequency was displayed on the skedgrid as #4
but with NO timeblox. Now I see that has been replaced by 11710, so
maybe there are plans for 11710, perhaps even with full power, but

nothing yet. 11710 has been registered in Jeff's HFCC as 23-03 in English & Spanish, 100 kW at 160 degrees (Glenn Hauser, OK, WOR)

** U S A. 5800, UT Sat Nov 21 at 0320, WRMI S9+20/30 with operatic duet --- certainly not another TRSW repeat as rumoured. Who would be playing classical on WRMI but Brice Avery? Yes, it is additional run of his 'Encore' hour, temporary fill or not? Soon outro as a bass/tenor duet from 'The Pearl Fishers' by Bizet. 0352 recheck, about to ``play out`` with Schubert's String Quarter #13, second movement. These are from the 21/11 Playlist, already airing. Play-out means Brice signs off early and never says anything at the very end; instead the music is still playing at 0359.5 when it's chopped off for ID, 0400 dead air and about to turn off. What will occupy this frequency-hour next week? (Glenn Hauser, OK, WOR)

** U S A. 9955, Sat Nov 21 at 1529.5, WRMI-3 with edited classic WNYW ID mentioning SW target countries including United Arab Republic: the union of Syria and Egypt which lasted only 1958-1961y altho Wikipedia elucidates: ``a sovereign state in the Middle East from 1958 to 1971. It was initially a political union between Egypt (including the occupied Gaza Strip) and Syria from 1958 until Syria seceded from the union after the 1961 Syrian coup d'état - leaving a rump state. Egypt continued to be known officially as the United Arab Republic until 1971``.

At 1530, 9955 starts in Spanish, but immediately blasted away by switch to Brother Hystairical incomprehensible rant, as TOMBS is extended Sabbathdays only past 1500 on several other frequencies for live disservice until 1700; yet sked is contradictory about 9955, still showing 1500-1530 S&S as 'Full Gospel Hour', with Blalock the Blaster, but I just missed confirming whether he was really still Touretting before 1529. Skedgrid also shows besides the daily TOMBS frequencies 1700-2100, 5800 also stays on Saturdays only. Confirmed at 1800 via TWR Key West KiwiSDR, *much* better than JBA 5950 (Glenn Hauser, OK, WOR)

** U S A. 5800, Nov 21 at 2318, no signal from WRMI-10, supposed to be SMTV at 21-01 (Glenn Hauser, OK, WOR)

** U S A. 7550-7590, Nov 22 at 0726, via WRMI 7570, TOMBS always bombs in here aimed right at us, but unusual to be splattering so out to plus/minus 20 kHz (Glenn Hauser, OK, WOR)

** U S A. 5850, Nov 22 at 2314, Brother HyStairical is VP, only S6-S7, hard to believe it's WRMI on NW beam which normally blasts in here. It's as weak or even weaker than never-strong 5950 to WNW. Can't be propagation, since 5800 WRMI is VG S9+25/30 with SMTV despite aimed SSE from FL. 5850 must be temporarily QRP, and is back up to full

strength checked a few hours later (Glenn Hauser, OK, WOR)

** U S A. 15555-USB, Nov 19 at 1534, just a trace of talk from WJHR, still reactivated (Glenn Hauser, OK, WOR)

** U S A. 5085, Nov 25 at 0215, WTWW-2 is S9+30 with request request, not so distorted as the music before and after it, tsk2 (Glenn Hauser, OK, WOR)

** UZBEKISTAN [non]. 12045, Nov 20 at 1411, big tone and no sign of a broadcast, but at 1413 now it's off audiblizing some weak talk, i.e. listed R. Liberty in Uzbek via Biblis, GERMANY site, but in sideband splash from 12050 WEWN. The tone must have been too strong for a jammer if any against this service (Glenn Hauser, OK, WOR)

** VENEZUELA. 6906V-RCUSB, Nov 20 at 0236, ROCV still AWOL at Bonaire SDR. At 0326 direct I have a noise blob with carrier at 6506.076, something else? At 0413, Pardinho, Brasil SDR has huge wideband noise blob around there (Glenn Hauser, OK, WOR)

** VENEZUELA. 6906, Nov 23 at 0311, quick check of Bonaire SDR finds still no trace of an ROCV signal (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 6000, Nov 22 at 0719, RHC is off by now, but there is a JBA signal, possibly French? Aoki/NDXC shows these could be on at this hour: R. Guaíba, Brasil, which has been gone for years; AIR Leh, Ladakh, India, which is still active on night frequency 4760 but this is at midday; Echo of Hope, Korea S, and/or NK jamming --- if 6000 be its jumparound frequency this week; not much of a choice, but Ron Howard confirmed VOH on 6000 as of Nov 16 (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 6860-AM, Nov 21 at 2313, S9+5/10 open carrier, often noted, every night? Maybe one of those RTTY QRX stations rarely bursting into axion (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 10533-USB, Nov 24 at 1348, 2-way in language, maybe Indonesian, as I am patrolling for CNR1 jammers (Glenn Hauser, OK, WOR)

UNIDENTIFIED [and non]. 11252-USB, Nov 21 at 1342-1345*, 2-way in Spanish, reception good enough from both sides, but I can't figure out what they are talking about, and wonder if even a native speaker could. Light QRM from VOLMET by YL on 11253-USB, which is getting a lot more QRM from this, i.e. RAF somewhere in UK (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 17545.06V, Nov 25 at 1539, JBA talk, off-frequency and wobbling so it's hard to measure to 3 decimal places. Only thing known

here is that Eritrean clandestine Bayto Yiakl, but it's supposedly Saturdays only at 1530-1600 via France, and this is Wednesday. Maybe expanded as the conflict along the border with Ethiopia is heating up. Would not expect ISSoudun to be that far off-frequency, so maybe some other site like UAE (Glenn Hauser, OK, WOR)

UNIDENTIFIED. 18127-USB, Nov 25 at 1530 and earlier, ragchew sounds like Plattdeutsch; mentions a VA9- call, not sure if his in Canada or a contact (Glenn Hauser, OK, WOR)
